Putting Thoughts To Work

SOFTWARE TESTING

ISO 9001 : 2000 Certified

## About Us

Grapesoft is an ISO 9001: 2000 Certified leading Software Testing, Business Analysis and Project Management solution provider with head quarters in Toronto, Canada and branches in Australia, America, Malaysia and New Zealand with offshore services from Hyderabad, India.

Grapesoft provides scalable solutions to assist the Business and IT Development Companies in ensuring that quality systems & solutions are met and delivered on time. We have a team that provides the right combination of specialized skills to get the job done.

We provide Software Testing, Business Analysis & Project Management solutions to clients worldwide.

## Highlights

- Expertise in delivering projects on diverse architectures / platforms & technologies.
- Best in class infrastructure.
- Core competence in testing, business analysis, project management.
- Proven methodologies supported by six-sigma & CMM.
- Superior execution with flexibility to adapt to any changes as per the requirements of clients.

## Our Objective

- G** Genuine
- R** Reliable
- A** Affordable / cost effective
- P** Product / Application
- E** Execution / Implementation (ST, BA & PM)

### Vision

Emerge as the leader  
in QA Solutions Provider.

### Mission

We envision 1500 resources  
with a firm presence around  
the world by the year 2009.

## Business Models

### Grapesoft project delivery models

Dedicated test labs

On-site / offshore management

### Grapesoft staffing models

Provides the right resources and helps in reviews

- 1 Test Analyst - 0- 2 years
- 2 Sr. Test Analyst - 2- 3 years
- 3 Project Test Manager - 3- 5 years
- 4 Test Manager - 5- 7 years

## Client Benefits

### Quality

Gathering Requirements  
Analysis of Requirements  
Technology, expertise and tools in V & V and QA  
Expertise in different application domains  
Independent, unbiased V & V Model

### Faster Turnaround

Parallel work on V & V expedites software delivery  
Experienced test teams reduce the actual time needed to  
develop test cases and conduct testing  
24 X 7 testing

### Lower Costs

Better Project Management reduces rework  
Better gathering of requirements reduces rework  
Better testing reduces rework  
Combination of onsite and offsite work reduces project costs

## Our Approach

Grapesoft tests the software against specifications. Grapesoft develops test strategy, test plans, test scenarios and generates test cases using formal methods to ensure high functional coverage both for system & UAT. We also follow the same procedure for Non-Functional (Load & Performance testing) where project demands.

We then test the software, report defects and put it through, as many test cycles as needed to achieve the desired quality.

## Testing Life Cycle ( TLC ):

## Grapesoft Expertise

Domain	Quality	Tools
Banking Finance Insurance Manufacturing Telecom Health care Web Applications	ISO CMMI	Rational requisite pro Mercury test director Rational rose Mercury win runner Mercury QTP Rational robot Silk test Mercury load runner Rational clear quest Bugzilla PVCS/CVS/VSS Test complete

Grapesoft Partners	Quality
Symantec Software Frontier software	A reflection of our commitment to customer delight.

## Our growth through our Work Force

The core of our team is a group of seasoned functional experts with hands on experience in the QA and software testing domains.

We possess the right mix of experience, knowledge and skills. All the QA and testing resources we recruit are handpicked through a rigorous selection process and subsequently put through an intensive training program to ensure that they are best-of-breed and meet the required standards.

Our specialists have the knowledge and experience to provide the outsourced software testing and quality assurance solutions which your company needs, to achieve success.

Grapesoft's highly qualified team, utilization of proven methodology / tools and success in numerous projects for worldwide leaders in the IT industry allows us to present the best software testing solutions in the industry.

## Guarantee

Before a resource is deployed for the client's project, (either on-site or offshore) We ensure

Capability of the test analyst to deliver test plans, test cases, test case reviews, test case execution, defect management and test metrics.
